

Getting Started With Mathchops

First Step: Complete the three games at the top of your screen.

Play the Level Setter

Your score on this game will determine your starting level.

Start

Beat the Level Challenge

Your level on this game determines the difficulty for every game on the site.

Start

Earn One Category Challenge Badge

Target specific problem types and difficulty levels with these short games.

Start

When Your Level Is Low: Beat the Level Challenge.

The Level Challenge

SAT® 330 Level Achieved

Play this game when you're ready to level up! Your level on this game affects the difficulty of the other games on the site.

Take the Challenge

Category Challenges

These shorter games focus on specific categories and levels of difficulty.

Play these when you are having a hard time beating the Level Challenge.

Home Create A Quiz Analyze Profile

What is the result when 8 is divided by $\frac{2}{3}$?

Answer

When You Can't Beat The Level Challenge: Earn all of the Category Challenges at your current level. For example, if you make it to 590, earn the 590 badges. Then try the Level Challenge again.
